

**Hank Asher**

Speaker: **Mr. Hank Asher** – Database Innovator  
Topic: *"Data Mining – A Billion Dollar Industry and a Unique Law Enforcement Tool"*  
On: **Friday, February 10, 2006**  
Location: **Everglades Dining Room**

Hank Asher founded Asher Painting when he was eighteen years old, had one hundred painters when he was twenty-one and sold the company in 1982 when it was doing about \$10 million a year. When the personal computer came out in the 1980's, Asher became enthralled. While the world was trying to get the PC to run a hundred disparate programs, Asher envisioned hundreds of PCs working together on a single program. He employed this vision when he founded and built DataBase Technologies and then later Seisint.

Mr. Asher founded DataBase Technologies in 1992. It first traded on the NASDAQ (DBTO) and then to the NYSE (DBT) where it had a marketcap of \$700 million when he left in 1997. DBT later merged with ChoicePoint. He founded Seisint in 1998, which was sold to Reed

Elsevier in 2004 for \$775 million. His systems have revolutionized the investigative industries. From law enforcement to insurance fraud, Asher systems are used millions of times a day aiding government and commerce to make society safer.

Mr. Asher sits on the Board of Directors of the National Center for Missing and Exploited Children (NCMEC). His systems have been donated to NCMEC since 1993 where they are used thousands of times a day looking for abductors, molesters and missing children.

**Christophe Fournier**

Speaker: **Dr. Christophe Fournier**, Program Director – Doctors Without Borders, USA Inc.  
Topic: *"Worldwide Emergency Health Care"*  
On: **Friday, February 24, 2006**  
Location: **River of Grass Ballroom**

Dr. Christophe Fournier is Program Director for Doctors Without Borders / Médecins Sans Frontières (MSF) in the United States. In this capacity, he oversees the program department, which monitors and interacts with MSF field projects around the globe. The department also manages the advocacy work of MSF in the U.S., including interactions with the U.S. Government and the United Nations.

Previously, Dr. Fournier was Operations Manager for field projects in Burundi, Iran, Peru, Cambodia, Guatemala, Haiti, Honduras, Myanmar, Nigeria, Sudan, Thailand and Uganda. During this period, Dr. Fournier oversaw all aspects of MSF's field projects and other operations in those countries; coordinating staff and supplies and representing MSF with local governments.

He recently delivered a statement to the United Nations Security Council regarding the concerns about the current crisis faced by people in Haiti, in particular in Port au Prince. Dr. Fournier received his M.D. from the University of Clermont-Ferrand in France, and also holds a degree in Tropical Medicine and another degree in Epidemiology and Biostatistics.

Awarded the 1999 Nobel Peace Prize, Doctors Without Borders, (MSF) is an independent, international, medical relief agency aiding victims of armed conflict, epidemics and natural and man-made disasters, and social and ethnic marginalization in more than 80 countries. MSF was founded in 1971 by a small group of French doctors who believed that all people have the right to medical care regardless of race, religion, creed or political affiliation, and that the needs of these people supersede respect for national borders. It was the first non-governmental organization to provide both emergency medical assistance and publicly bear witness to the plight of the populations they served.

12:00 Noon      Luncheon at The Naples Beach Hotel  
12:45 p.m.      Address by Speaker  
1:15 p.m.      Questions from the audience
